

Virus & Spam Removal/Repair

Amazingly Spam is more of a pest than Virus's these days however you still don't want either. Which is why we can provide you with quality virus and spam checking solutions that we use ourselves personally - so you know your getting a good solution.

What is a Virus? A Virus can cause your computer to slow down, stop working or delete important files. The virus can come in from emails or media such as USB drive or floppy disks.

What is Spam? Spam normally tries to capture important information from your computer such as your web browsing patterns or send you distasteful emails. Some can even go as far as requesting your bank details (Phishing).

The best form of attack is prevention, but if you have been hit by a Virus or Spam then we can help to.
