

Wireless Networks

Wireless technology is one of the best ways to link up several PC's - to share resources such as the Internet or printers - without having tons of cables dotted around the place.

So if you had a laptop you could surf the internet from your garden whilst enjoying a nice beer (or two).

However if you are put off using a wireless solution - due to security concerns - we also offer a different wireless solution that will literally amaze you - honest.

Please use the Contact form if you are interested in using this service.
