

PC Repair

There comes a time when you turn on your PC and nothing happens. Of course having a PC down for more than a few hours could cost you money.

Which is why if the problem can not be fixed on-site we can loan you a spare PC whilst we repair your old one -thus allowing you to continue working on emails and documents without much delay.

We can also provide a basic form of file recovery so even if you have completely deleted files from Windows we can attempt to recover these for you.

Please use the Contact form if you are interested in using this service.
